Ignition Coil High Voltage Display : 6 ...
instructables.com

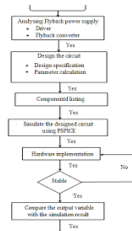

$L =$ Inductance of primary winding.
 $R_{primary} =$ Resistance in the primary circuit. Includes the coil winding resistance plus any other resistance in series with the primary.
Steady State Current:
 $I_{steady\ state} = \frac{V_{source}}{R_{primary}}$
Time Constant of Primary Circuit:
 $\tau = \frac{L}{R_{primary}}$
Current in the Primary Winding at any instant:
 $i(t) = I_{steady\ state}(1 - e^{-t/\tau})$
Energy Stored in the Primary Inductance:
 $E = \frac{1}{2}LI^2$
